

I am a hard of hearing woman. I use closed captioning to watch tv and movies. I would like to see captioning on every program that is aired, broadcast, or shown on a movie screen. It is discrimination to not provide captioning in all media that can support it.

I'm don't understand why from 2 am to 4 am I can't get captioning on broadcast programming. I would like to see it mandated that all programs and movies provide, pay for, and use captioning in all programs, movies, news, and all other programming. I do not like the idea that the government is deciding what is the bare minimum of captioning, take it to the maximum, caption everything.
